

I agree. The point of the workshop is to attempt to diffuse many of the concerns and the emotionalism prior to the September 8th hearing. I also think it would be great to have the Police Chief from Tustin in attendance at the workshop if possible, and also at the September 8th meeting.

Maryann,

My recommendation is that CC members not attend these meetings primarily because they will be put on the spot and forced to respond to issues prior to the CC hearing. Staff can serve as a buffer to this process by allowing the community to vent and accurately answering questions. I advised Chuck too and he agreed.

Hi Patrick,

Thanks for following up with this lady. I'd like nothing better than to jump in the middle of this one; however, after what I've heard about the last workshop, my attendance might become a hindrance to the discussion. I definitely think the subcommittee members should attend since they participated from beginning to end. With the exception of the first meeting with RCC and the OC Mission folks, I have been a very happy passenger and cheerleader on this one.

If we could get the police chief from Tustin to attend and confirm the safety of that project, that would be helpful. Attendance and comments from neighbors or Tustin residents would be helpful too.

Maryann Edwards
